Re: FCC ID: X32-ARX11B2

To Whom It May Concern:

The following application is submitted on behalf of our client, iKeyless, LLC , for evaluation of their model 300-0388 for certification under FCC Part 15.231.

The 300-0388 is an aftermarket replacement keyless entry remote for automobiles. The remote is designed such that it can emulate the functionality of a wide range of existing OEM remotes operating at 433.92MHz with ASK modulation. The emulated remote is configured from a predetermined list of car remotes by the user. The remote features a microcontroller/transmitter, 7 micro-switch dome buttons, and a user LED. The remote electronics are contained inside an ABS plastic shell with a labeled silicon rubber pad over the buttons. The device is powered by a single CR2032 coin cell battery.

The 300-0388 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
